Never made a comic before but I really wanted to express myself on this:

(Yes I'm aware that this image is larger than the forum recommended size)

Is it any good? whats the game about and hows it play online, just gimme a quick walkthrough of whats the gaol of multiplayer.

Seems so far renegade and half life 1/2 multiplayer is still going strong because of the mods and overall gameplay.

Team fortress 2 is one of the latest Valve developed games that is solely based on Multiplayer.

Two teams fight over control points or capture the intel (CTF mode). There is also a mode where one team owns all the points and the other team has to try and take them all in an epic battle

There are several classes to choose from:

(Quick look at all of them)

This is also the first game to use the steam community permanent record but is no where near detailed as left4dead is going to be but its an excellent feature.

Basically this game kicks ass, just youtube some videos, it will give you the basic idea but nothing compares to the game play. I wasn't looking forward to this title at all and just got it for the HL2:Ep2 pre-order but oh man it gets you hooked and fast.

My class: Engineer
