[View Forum Message](#) <> [Reply to Message](#)

I have decided to make 1 last topic that i will post all my problems etc because i have been on this site for like 3 weeks and posted about 49 times . i do not like spamming and neither do others->

So anyway, where and how do i obtain GMAX, it is considered vital in some things i wanna do like (making my own security doors) etc. Now please there is like 500 versions of it, which one is the best and most reliable version?

Subject: Re: All problems-Creating "Maps"/Modding terrain

[View Forum Message](#) <> [Reply to Message](#)

49 post. K

Your profile says 20 post.

Gmax is free, get it at google.com fast and easy

black-cell.net on their site has a activation registry hack that lets you use gmax full version for free without the 30 day annoyance.

No backdoors, if the program doesnt use the internet then how will it make backdoors

[View Forum Message](#) <> [Reply to Message](#)

I am happy to follow your advice and everything no problems but as i said in first post, there is alot of different versions...which is the best one

P.S:Is RenX the same thing as GMAX, or another name for the program?

Subject: Re: All problems-Creating "Maps"/Modding terrain

[View Forum Message](#) <> [Reply to Message](#)

There's 500 versions of GMax? Damn, I thought there was only one. Well, I'm using version 1.2, so go for that. I may be able to find a link later.

RenX is a plug-in for GMax that lets you mod things for Renegade specifically. It comes with the Renegade Public tools package.

[View Forum Message](#) <> [Reply to Message](#)

Googling gmax gives you 500? Wow only 1 version exist and you found 500? you must be adventurous.

download the crack/bypass from blacl-cell.net in the renegade or tools section, i forget, then just click it and hit yes.

[View Forum Message](#) <> [Reply to Message](#)

Without the crack though, it keeps asking you to register/sign up or else it expires, the registry crack makes it never bother you again.

Subject: Re: All problems-Creating "Maps"/Modding terrain
Posted by [Slave](#) on Mon, 01 Oct 2007 22:59:13 GMT
[View Forum Message](#) <> [Reply to Message](#)

Hm, i could register just fine. I believe turbosquid handles the registrations now. But things could have changed since I registered. Either way, the bypass should do it's job just fine too.

Aob's backdoor comment was silly, but I can see where it came from.

Gmax is free, But Autodesk bought them out, Now it has a stupid price tag. :/

oh right, <http://www.turbosquid.com/gmax>

When you install it, Install Level edit and you'll be able to use RenX..

Subject: Re: All problems-Creating "Maps"/Modding terrain

Posted by [bat66wat6](#) on Tue, 02 Oct 2007 15:33:11 GMT

[View Forum Message](#) <> [Reply to Message](#)

Im downloading GMAX1.2 as i type this post>YAY

But i am wondering, is GMAX hard to work with, like leveledit,(DO you need years of experience?)

You said RenX is a Plug In for GMAX, what is a plug in, and what does it do?

Subject: Re: All problems-Creating "Maps"/Modding terrain

Posted by [AoBfrost](#) on Tue, 02 Oct 2007 15:50:07 GMT

[View Forum Message](#) <> [Reply to Message](#)

You dont need years for anything, I'd say 2-3 weeks and you get the hang of it.

[View Forum Message](#) <> [Reply to Message](#)

Well i am sure that is true, i look forwards to it!

but there is a problem, when i load it it comes up with this, amongst maybe a few other messages of that nature, please i have looked forwards in a sense to getting this program so i can edit/

maybr create my own maps in the future when im good at it...but if there continues to be these kinds of probs with the program ill have to abandon it
So take a close look at the SS below and please explain what is wrong and how to fix it..thnx guys

[View Forum Message](#) <> [Reply to Message](#)

Yeah thanx 4 that Frost...

Well umm, what format do you want it in? I do not know any other way to show you the PIC...i print screen then paste it into word and save then attach to a post if necessary, easy...

Well anyways..., can anyone explain the problem and how to fix?

Subject: Re: All problems-Creating "Maps"/Modding terrain

Posted by [AoBfrost](#) on Tue, 02 Oct 2007 18:25:19 GMT

[View Forum Message](#) <> [Reply to Message](#)

Omg....Do the same but paste it into paint, then save as a jpeg or png format, it shows alot easier, downloading word docs are crap, some people may not have microsoft word to open it, but everyone will have the ability to see a jpeg or png...I choose those two because they both look good and file size is smaller.

Subject: Re: All problems-Creating "Maps"/Modding terrain

[View Forum Message](#) <> [Reply to Message](#)

Hey AOBFrost, u helped me on severall ocassions, but you do get a bit aggressive, let it go man, no big deal i will make all my ScreenShot attachments as JPEG, and about my REAL problem with GMAX (apart from not knowing how to use it) i managed to fix it took me about an hour none stop but still, it works

P.S: Please can someone give me a great understandable tutorial from somewhere for GMAX

and RenX, im totally lost with em, it is really technical>

Subject: Re: All problems-Creating "Maps"/Modding terrain

Posted by [AoBfrost](#) on Tue, 02 Oct 2007 22:59:22 GMT

[View Forum Message](#) <> [Reply to Message](#)

Oh I dont mean to be aggressive, It's just recently theres been all these new modders, and they are nubs, not like you, they are super nub and bother everyone, and when anyone ask anything now adays, all I can do is point them to the right direction, and some the of past people...they ignore our post and then make more topics asking the same question xD

Subject: Re: All problems-Creating "Maps"/Modding terrain

Posted by [Ethenal](#) on Tue, 02 Oct 2007 23:06:57 GMT

[View Forum Message](#) <> [Reply to Message](#)

Hey, at least you listen to our help.

Turbosquid handles GMax again I believe, but it takes some extra work. (After you request an email, you have to ask it to resend, but the registration fix works fine.)

Subject: Re: All problems-Creating "Maps"/Modding terrain

Posted by [AoBfrost](#) on Tue, 02 Oct 2007 23:07:36 GMT

[View Forum Message](#) <> [Reply to Message](#)

I never got my registration email back, so I used the registry hack.

Subject: Re: All problems-Creating "Maps"/Modding terrain

Posted by [bat66wat6](#) on Wed, 03 Oct 2007 14:57:22 GMT

[View Forum Message](#) <> [Reply to Message](#)

I've registered my GMAX without any registration hack thing and it seems to run fine with no errors now, i managed to stop it bitching about the "GMAX Driver" when i 2x click the icon...

And RenX appears to work fine 2

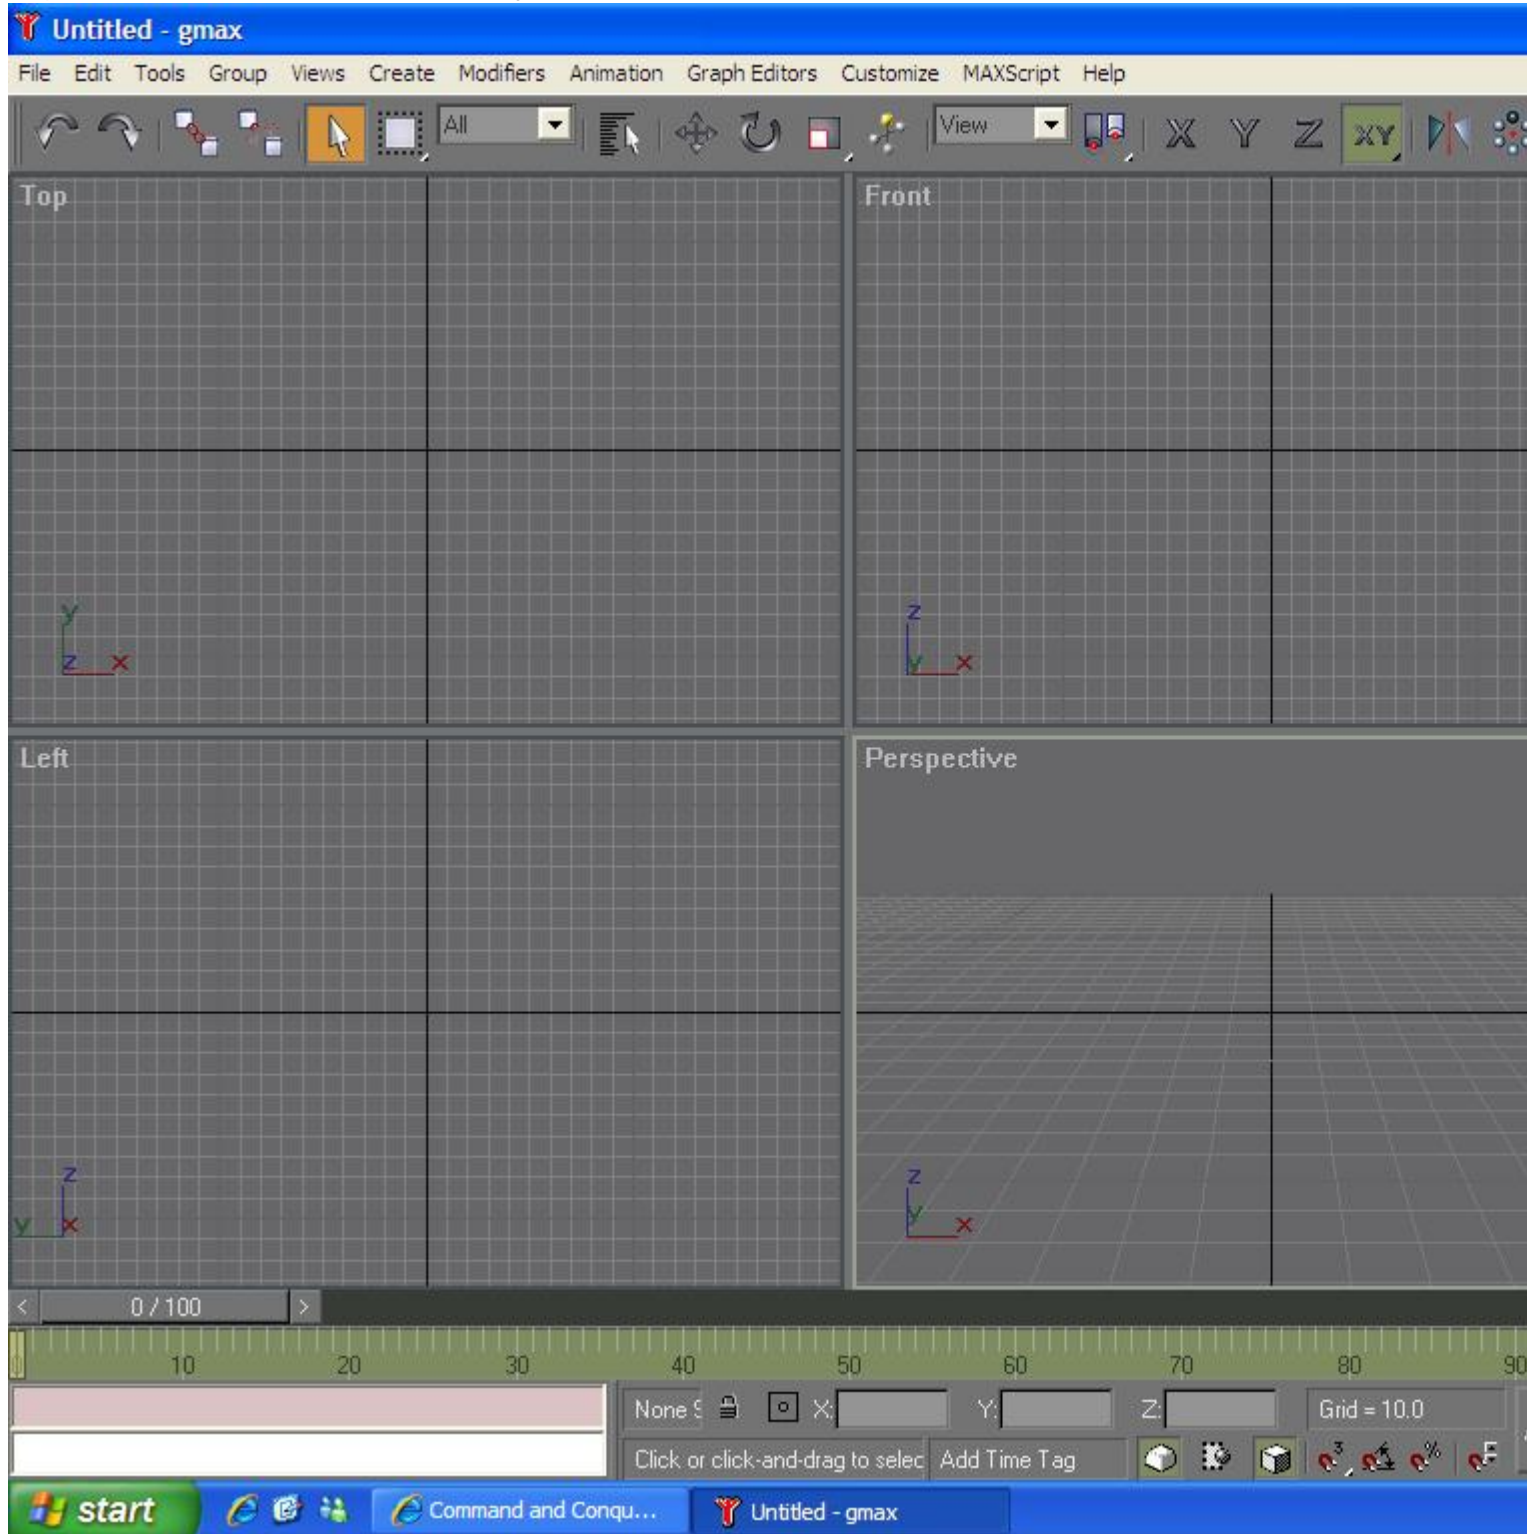

There are 2 SS's of what my RenX and GMAX look like below after loading...is there any setup further required of the 2 programs or am i good to go to the next phase(e.g Attempting to make basic terrain and texturising them?)

P.S:Can someone please point me to a Really GOOD Door Making and placing on the map tutorial(There is one on Renhelp.net but the Guy just starts with "Make your door in GMAX(It looks like this)"

with a Screenshot of his door below, i really need a clear tutorial, i only got GMAX about 2 days ago

That's a leveledit setting, wich affects the turret rotation.
By default the maximum rotation is set at zero, this guy increased the number.

Nice signature, it has powerful message that makes you think about life.

I told Frost this already but my Computer got wiped cus my dad got really pissed that his Area
does not work
Anyways, all is recovered, the scripts, renegadepublictools etc.
All except GMAX I swear i saved the installer for the 1.2 version on my PEN drive?
Anyways, please i have tried to redownload it but i just cannot find the download site that i got it
from last time....

Can you provide a link 4 me please.
(Please don't say just google it, i tried it loads of times, all the links from google)

I have been posting reply's recently that have not been relevant to the my problems of modding...beacuse well my comp got wiped and i lost most things.

umm i managed to get the FDS, levelEDIT, GMAX etc all working and fine with he scripts 4 levelEDIT 2 whew

But now i come to setup my FDS installation and it wants a serial number... I mean i put in the Code that is in my Renegade game case and it will not let me proceed to the next step of the setup

I had this problem once and a very close and deer mate helped me through it all the way, he gave me a code from somewhere(he never said where, just pasted it 2 me in MSN)

I know you can make one up but NR and my FDS won't like it apparently...so basically please can someone out there give me a legit Serial Number please....

IDC where it comes from, AOHost.com(I looked around there there and i could not find one)

To explain my prob further i have attached a SS below->

File Attachments

1) [FDS Setup Problem.JPG](#), downloaded 435 times

Renegade Dedicated Server

Registration Information

In order to run the Renegade Dedicated Server dedicated server, you must request a special serial number from Westwood Studios. If you do not have a serial number, request one at: <http://renegadeserver.westwood.com>

Please enter the serial number and the associated Westwood Online login name and password. All fields must be filled in to proceed.

Westwood Online login name:
A000Hoste

Westwood Online password:
XXXXXXXXXX

Confirm Westwood Online password
XXXXXXXXXX

Serial number:
0656015870478988563560

Serial from my case is in and all other fields filled in correctly, yet the Next button remains inactive

< Back **Next >** Cancel

Ok i sorted the FDS problem as you said "just put in 0669 then random numbers then replace that later after it's insalled with the Renegade Serial"

Yet after this i setup my NR(Just the FDS stuff mainly) ran it as normal! AND BOOM, it fucks, coming up with

"Creating game channel"

"Failed to Create Game Channel"

And this will repeat 4 ever and ever and ever...

There is a attachment below, please, it ruined my hosting chances ages ago...i thought it would work after comp being completely wiped, i mean i reinstalled everything from scratch and yet it still

does this...other problems i posted about be 4 weren't as urgent! I am REALLY REALLY PISSED OF ABOUT THIS! Please i am really calling 4 help here...if my FDS doesn't work then almost all i learn in LevelEDIT, GMAX, and W3DViewer is gonne be useless 2 me...

Take a look at the SS please...i need help!

Look what hes saying is you cant just use any host name.

you need to use a host nick, like when you log into xwis to play.

Its in your server config file in your C:\westwood\RenegadeFDS dir, do go in there and configure

everything in there properly and your FDS will log on to xwis/ gamespy when you configure your server config file properly,so until you do that your server won't creat a gamechannel till you do it right, SIMPLE! and there are stickys for you to read so you can do that i believe.

Posted by [bat66wat6](#) on Thu, 11 Oct 2007 15:57:28 GMT

[View Forum Message](#) <> [Reply to Message](#)

Kind of a breakthrough...well umm, using NR i changed the the host name to the actual account i use online "bat66wat6" and by god the FDS loaded, connected, loaded and worked fine....

But, that is kinda useless, running it like that with that name means that i can't join the server as another player->and i will get that Gameplayer Pending as it runs as Dedicated Server (I wanna keep so people can't do extras ingame)

I think it is the account A000Hoste XWIS in renegade that is the problem as when i login with that account on Renegade it does not work! The server list is blank! If we can fix that problem then maybe we fix the FDS 2? So please any ideas on why A000Hoste doesn't work?

So can you actually help with the FDS problem!

P.S: Can someone please tell me how to actually use the XCC Mixer? It seems simple but 4 the life of me i can't figure out how to change the C&C_Walls_FLYing.lvl i've modded and saved to MIX(There is also the LSD and LDD file created after i saved it in leveledit, are they part of the MIXING process?)

Oh oh, let's just ignore bat66wat6 cus we don't care about his problems anymore!

LOL, that;s what ur doing to me!!

As long as ur all ignoring my problems and posts let's go off topic 2 shall i!!

MY FDS WORKS!!! IT WORKS I CHANGED THE HOST 2 a00000btw and the password in NR and IT BLOODY WORKS

BUT... After i join as bat66wat6 i do not have my Admin powers that i granted myself from NR, i have to login!!

I already check listed (Auto-login moderators in NR)

How do i change this, as having to type my password for NR in ingame sucks->plus other people can see my password and exploit it!!

Ontop of this after i logged in i minimised Renegade nad went ot NR and onto the FDS Control pannel and it showed that i wasn't ingame->it took like 10 mins to realise im ingame and let me use my powers even after i logged in?

Ok my FDS works and everything and all is well except, i have to login after i join my own server->

But still...i watched a tutorial made by Reborn(Great guy) about Server Sided Refinary tick rate->i watched it thoroughly and followed his every step by the book! Except the parts where he extracted a new objects.aow from some zip folder he had on his desktop SSAOW1.5WFDS or something very close to that

Anyway, after i changed the Ref tick rate and changed objects.ddb in my mod folder to objects.aow and moved it into my RenegadeFDS/Data folder and loaded my FDS, then started Renegade & joined i dicovered that nothing had changed...the Ref tick rate 4 GDI(The 1 i changed) was still the boring 2 creds per second rather than my 4 creds per second, and when the Harvy docked it still dropped just 300 creds rather than 500->?

I mean im like WTF MAN-> what wrong i followed his tutorial by the book>>
