I want to host a server (got players in a few minutes), but it only lets me to have 3 players. How can I change my bandwith so I can add more players?

My information > Bandwith > LAN/T1

You should know where that is if you're playing with the client's hosting options.

Edit - Pah - Spelling

Sigh.

Main Menu > Multiplay Internet > Westwood online > Sidebar > My information

---

Thank you so much.
I was at the sidebar previously but the "my information" was not there. Now I found it.

Thank you again!

It's only there if you're not logged into WOL/XWIS.

No problem.
