Can people please not detract from the topic in tech support questions? It really doesn't help.

You can download maps with bots.

Check http://www.renhelp.net/downloads/maps/index.php and download some maps with "bot" in the name. Then unzip them to both your data folder and off you go .

I can't help you with that. I didn't make these maps. All I can say is that you need to unzip the .mix-files in your renegade/data - directory.

The bots are quite sucky in Renegade. It's very hard to make them use vehicles, ...

So my answer would be no.
