Hi.

I have 2 problems.
1)My renguard never wants to auto update. How come

2) Previously i had renegade installed on my pc and then renguard updated for 5 min and everything was changed;

I could join servers very fast and when some one sad 'affirmative', for example, you could see a green <!> above its head. Renguard updated the game and i really liked it.
But i had to reinstall my first decade cause spyware and now i have this damn old version again.
When i want to join a server, it takes 15 seconds again. How undo ?

Thanks

If you have only installed Renegade and patch 1.037), then use
http://download.renguard.com/cp2/patcher.zip
and
http://download.renguard.com/cp2/patchall.zip
