Hi. I need to know how i install a patch  
(Command & Conquer Renegade v1.037 Patch)

I got renguard installed and renegade pls help me thru.

->-> Im wondering if this patch adds the countdowns for incoming nuke -and ion strikes in  
multyplayer.

Also; Will this patch let me join servers faster (i thought this had something to do with 'skipts'?) and  
will it add marks above the heads of allied players in-game when some one does a  
radio-command like <Affirmative>, so you see directly what person around you is doing the radio  
command.

PLs help

No, this patch is the official Westwood patch for renegade. It is already included in the first decade  
so if you have the first decade, there's no need to install it.

The patch making maps load faster and "enhance" your game are the core patches (see this  
subforum).
