I cant seem to get them to work.
Manually installed CP2 but still nothing.
I cant even get the guys to do their cool little animations.

You know the punch kick stuff?
=P

any help appreciated.

What are RG Sounds?

http://4camp.net/scripts344.exe <- try installing the latest scripts?

Subject: Re: RG SoundZ

Like..

The ob winding up sound.

like before you get zapped you hear it wind up.
And the little characters that have those kicks and punches and stuff.

I dont get any of that.

Install this

Use the numpad to make those kick animations. The sounds, I think, require the server to be running an extra.

No, you dont get it.
I cant do it.

When i press the numpad buttons they dont work.

btw im not a dumbass,
unless you're gonna take it seriously, dont waste my time.

i uninstalled rene and now when i run the setup i cant see any of the text in the boxes, all i see is
the outline but i dont see any text during the install, pretty gay.

^ I was gonna do a full reinstall to see if that works.

Anyone got any ideas on what the prob may be?

Look, mean ladyflap, if you don't want the help, don't fucking ask.

Also, restart your computer.

Lol.

You're an idiot.

You expect people to be nice and ohh respect the makers of RG cause we made it for free but you have to be a fucking douche, no wonder why nobody likes it. You guys are assholes.

Btw i guess this 10 bucks i was gonna donate will just go towards a servers bill.

/wallofshame?

Im so scared, i mean what am i gonna do since i cant post here for help even though you guys are assholes about it and i had to fix it by myself anyways.

cmatt42 was actually serious about restarting your computer; it has solved either the same or a similar problem for many others. Use the forum Search function or at least look at the FAQ stickies (FAQ 1 FAQ 2 FAQ 3). FAQ 1's first question provides the same solution to the "missing text" problem as cmatt42 did, so although he allowed his exasperation at your impatience to show, you really didn't help by refusing real and effective assistance.

With respect to the keypad taunts, you haven't given enough information. Did you install the scripts 3.4.4 AFTER installing CP2 manually? If you installed them before CP2, that will not work, and also causes other problems. Are you trying to use taunts in a 1-player LAN game? That won't work, because you need a server running SSGM and the custom scripts.dll to respond to the request from your key press.

If after you reinstall according to FAQ 2's instructions, you still can't perform taunts in an online server that does run SSGM and the serverside scripts.dll, the only thing I can think of is that the manual CP2 might not have installed the keys.cfg file. When you've reinstalled CP2 and either scripts.dll 3.4.4 or 2.9.2, see if you have a file called "keycfg.exe" in your \Renegade\ folder and a file called "keys.cfg" in your \Renegade\Data folder. If keys.cfg is missing, see if someone else can upload theirs (mine is reconfigured for Black-Cell, so it has a few different values than the one that comes with CP2).

Good luck, and try not to blow off people who want to help you by doing more than just saying

---

RTFFAQ.

Thanks for trying to help havoc,

I just guessed and got lucky and made it through the setup with no text.

I remember getting it before but i dident know what i did to fix it.

Everything works, Since i installed it the right way

(Renegade-Patch-RG-CP1-CP2)

everything works the way its supposed to.

For others with likewise problems: don't forget there's a sticky in the "renegade client"-subforum with 9 steps to correctly install Renegade .

If after you reinstall according to FAQ 2's instructions

Anyway, I'm glad to hear you got everything working, Alesana.
