The server that APB runs on is top notch.

The only reason you are lagging is because 1) Your ISP, thus Internet sucks. 2) Your computer sucks. 3) You have shaders on, that your graphic card can't handle.

Renegade is made so everyone that plays is given enough bandwidth from the server to able to play, this is how one player can't lag an other, so when I say, you=lag, it really does mean, you are lagging and not the server.

Disable the shaders in the config unity, that should help.

Thanks for having 25 FPS when you are idling around. Retard, if you even had a decent CPU instead of a Pentium 2, you won't lag.
