The First decade was released long after the original Renegade, EA decided to change the paths so Level Edit is trying to get files from the wrong location.

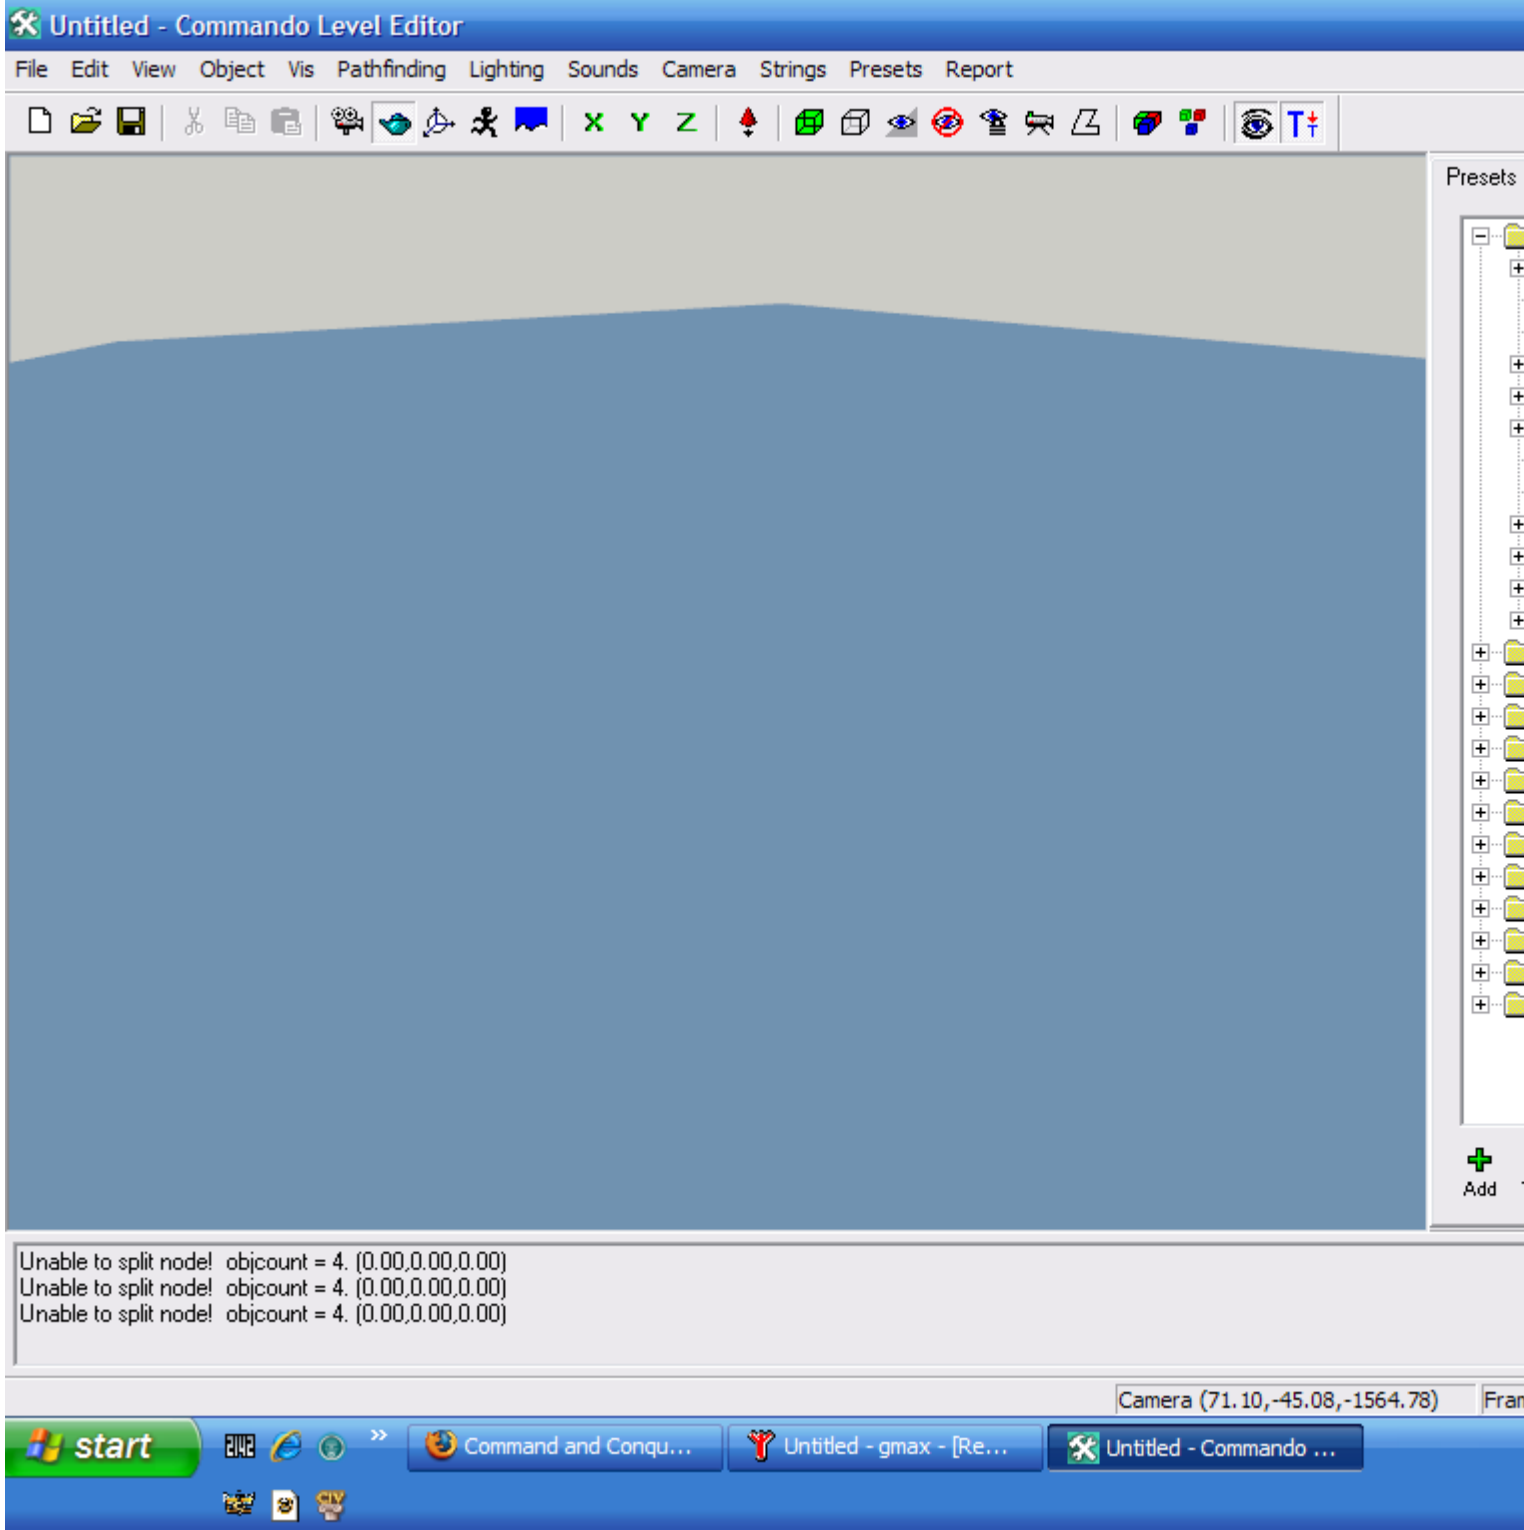

Just follow that tutorial posted above and you should be good to go.

If its the same model as you used in your first screenshots then your path to the model must be wrong.

To be certain just post you model on here with the upload file feature on each post.

like i said before as looking at the ss i didnt see

your terrian will not work unless you put the texture file you used for it in the same place of the w3d file
