I don't know if this is a public or self made skin specifically for one person, but I want it and would like to know where to get it if it is public
I'm talking about the lights btw.

thanks.

GTFO Trio.

I have no idea where to find that model/skin though.

You just painted over the red in solid blue, i filtered the red to blue so all the parts would still have the details in the metal.

Also made this one, liked the light blue from the first image:

Oblivion165 wrote on Sun, 09 December 2007 01:05I attached the skins to each post

oh i see now yeah. shouldn't it be like .dds instead of .tga though? Should I rename it or copy it like that? It's really nice by the way

Subject: Re: Where can I find this?

Posted by [Trio](#) on Sun, 09 Dec 2007 06:07:14 GMT

[View Forum Message](#) <> [Reply to Message](#)

Ok, I've mentioned this several times now, so please stop posting blue light tanks. I asked for the headlights on the harvester and the lights on the street lights. As shown here:

Edit - I apologize, I probably should have made it clearer that I was talking about the HEAD lights, not the light TANKS

but again, i appreciate the attempt in help.

Nah, Ren will use TGA or DDS. It just cares about the filename and thanks

(Bah had to double)

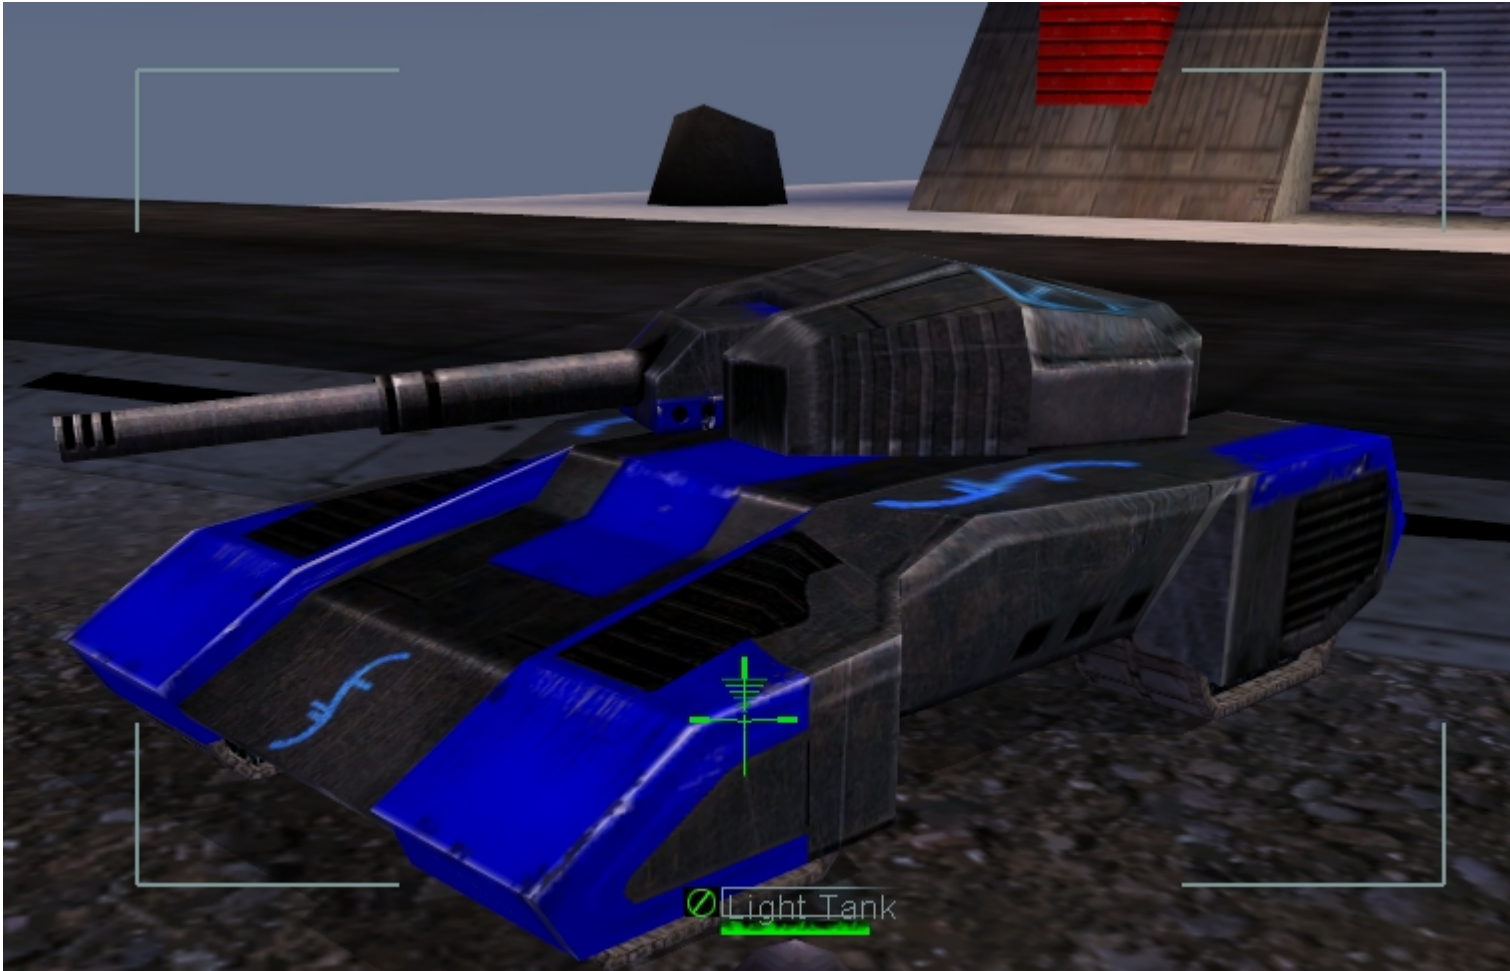

You were right rocko, only works with DDS. Also added the other image to blank out the nod logo.

Ok i'll let the thread continue where it needs to now, just wanted to post the fix.

I only noticed this topic after Trio sent me a private message.
He now has what he asked for.

Some of those things are included in RxD (the silly mod for renegade demo).

By the way, the light blue parts on the light tank were done with a second scrolling texture layer, wich made it look like plasma or blue goo was flowing through the tank. Or something like that. Never felt like finishing it up, and eventually lost the gmax file for it. rip.

[View Forum Message](#) <> [Reply to Message](#)

No it would not. The files are homebrew, and put on the map via leveledit and ini files.

Yea it was the prototype wallpaper of my Renegade Wallpaper series (already postet this one here a half year ago^^).

This tank doesn't work ingame - it is not even made in Gmax/Max. This picture was rendered with Cinema 4D. Yea and even if you setup this tank for Renegade, you can't use it as a replacement.

So don't ask for a w3d - it doesn't exist.
