You need to run game.exe and game2.exe in windows xp sp2 mode and with admin rights.

That's what u get when running Vista...

game.exe is usually renguard(+ renegade of course) and game2.exe is usually just renegade.

Yes, you can. You just need to run Rg (game.exe) and renegade (game2.exe) in win xp sp2 compatibility and admin mode.

right click game.exe > Click Properties > Compatibility > Check "Run this program in compatibility mode for:" Select Windows Xp(Service Pack 2) > at the bottom Check "Run this program as an administrator.

Do the same for game2.exe

You can probably find them in an EA folder in Program files. You could always use Windows search, too.

File path > C:\Program Files\EA Games\Command & Conquer The First Decade\Command & Conquer Renegade(tm)

That would be the file path for it if it is installed on "C:" if not just replace "C:" with w/e it is.

You do not need admin mode to run Renegade...
