I have a friend of mine from my clan who cant get renguard to work. keeps coming up saying she was banned Ghostshaw. She is a personal friend of mine and i know for a fact she has never cheated.

Message from RenGuard: You have been banned by Ghostshaw on 30.12.2007 16:39:33 for Go to www.renforums.com to get unbanned and fix your renegade install.. Goodbye.

[GDE]Ashley_Lorien is her playing name

She wants to get renguard working since every noob in there thinks she cheats cause she isn't running RG. She gets unrenguarded so she can play but all she has to do is kill a few and they forcerg her again.

So anyway how can she get renguard installed. That date is when she tried to install RG to begin with. Like it was automatic or something.

I sent a message to ghostshaw as well.

There's a forum specifically for this sort of thing. Your friend has been directed there by Ghostshaw to get her ban removed.

I already told darkknight what to do. The reason I banned her is that her renegade install is corrupt which caused the RG logs to overflow with cheater messages.

I thought the Ban message was simple and explains a lot.

Reinstall renegade, problem solved, So why does your friend have a hard time understand this is what I really want to know.
