in XCC mixer there is an option called

copy as TGA  
use that one.

---

---

the texture are not from a mix file or any file that xcc mixer allows

and anyway i havve done that theres another ERROR now thanx anyway

heres 2 ss ok i got it to texture and i have done the W3D options but when its in game it is able to

---

be walked thru besides the little bit in middle

how i fix that

I Will Make A Little Video Of It An Post In New Reply

ok i got that bit working thanx for help but now

i need to find out how to change camera view

so you can see all of the blane

like humvees them you can see all of the car

fatalcry wrote on Thu, 10 January 2008 13:56

OMFG they are good. Not the best but they are good.

You can model and Get i to work in LE but you need to know how to bone the vehicle. The renhelp link is your only option.

I've never gotten wheels to work, they spin on the wrong axis. No matter what angle I change the bones axis to.

---

i know but i dont get the tutorial i tryed it and the wheels wouldnt move

the camera is too close to vehicle on renegade i need to fix that and to fix the wheels and it would be done

but then i would have to make a very big map to put them on

its the same for all vehicles - read the part that says about worldbox

AND STOP POSTING 3 TIMES IN A ROW

---
