ok here it start i open ren on wol/xwis to play on mp-missiondm server but it couldnt open so i kept trying and then i get kicked then they allowed me again and i played then 1 day after i was gonna play i went on wol then pressed on missiondm and i couldnt press start again then i deleted evrything i play apb too a mod for renegade i deleted evrything of that to then i tryed install renegade again but it couldnt a sytem error came then i took all the folders i dleted and evrything back but still didnt work then i deleted evrything and removed it from my paper thing and i couldnt get back then i maded system restore so i got all back where it was i have now to but now i get messages whatever i press on games of renegade

1. the cd is in and it says: you must run the game from its install directory.

2. i go c westwood renegade press on game and it says: Error crating hash of renegade serial, try reinstalling renegade. i have but it cant

3. press on game 2 and it says: set working folder and try again

4.i press on the one called renegade and it says: you must run the game from it install directory.

and i have tryed to use the auto run uninstall the other to and it cant install again

if you can fix this you are really nice the last thing ill do if nobody can fix t is try to reinstall my windows xp

Yup, reinstall seems the appropriate solution to me!
