Hi, I'm new here, and I downloaded almost everything to start modding from renhelp.net, I can install everything, except the RenegadeToolsinstaller2.

I get this message: "could not initialize installation. File size expected: 24830329, size returned=195640. The parameter is onjuist"

"The parameter is onjuist" means the Parameter is wrong or something (that's because I'm Dutch and my PC's language is set to Dutch)

Can someone please tell me what's wrong? and where the problem lies. Check the attachment for the file

#### File Attachments

1) [RenegadeToolsInstaller2.exe](#), downloaded 148 times

The problem appears to be that you have an incomplete download, start a fresh download from [ftp.westwood.com](http://ftp.westwood.com) and that should work.

---

Your installer is only 191kb, while the installer \*should\* be 24249 KB, over 100x the size of yours.
