[View Forum Message](#) <> [Reply to Message](#)

I have the new scripts installed (213) plus corepatch 1

I keep crashing to desktop when joining UNRULES: New maps server when it is hosting C&C_Marsh_Beta2.mix

This happens 30 or so seconds after I join, I don't seem to have to do anything in particular for the CTD to happen the server was almost full.

content of _except.txt

Error code: EXCEPTION_ACCESS_VIOLATION

Description: The thread tried to read from or write to a virtual address for which it does not have the appropriate access.

Access address:00000000 was read from.

Exception occurred at 00697A81

My problems are=

a) since several months the map C&C_Quickdraw.mix doesn't work right anymore, the following textures are missing= Terrain and Building walls of various buildings.

b) marsh BETA 2 is buggy, i couldn't play it ever! This doesn't belong to the scripts I guess. Not with 1.93, 2.01 and 2.13. Even when I'm a few seconds in the map, my Rene crashes to the Desktop and I can reload RG and Renegade...

c) on some servers the following happens from time to time= When I turn around with an abnormal speed (engi vs. rusher Infight for example) instead of using X (180 turn) my game crashes to the Desktop. This is incredible, I can play for hours on Unrules or MP without having this issue, and sometimes I'm playing for just a few minutes till it crashes... The error shows various offsets...like 00x0000e51a....0x000e77bg....I make a SS next time.

----technical specs----

AMD AthlonXP 3200+ (2200Mhz)
Nvidia Geforce 6800 SilentPipe from Gigabyte -AGP- 12xPixel- / 5x Vertexshader not modded!
1Gb Corsair ValueRam (Memtest no errors)
Nvidia Forceware 66.93 (the best driver for Geforce 6 series AGP without SLI)
AGP 8x ON, Sideband addressing ON, Fastwrite OFF
nForce2 ultra 400 Chipset with the official 5.10 driver from Nvidia
No OC at all

EDIT= Actually using 2.13, I experienced this Offset-error with 2.12 also.

EDI"= Downgraded to 2.01, less crashes experienced. Here are the pics= 3 different Offset errors.

No real problem, but whenever I exit from Ren, It claims it preformed an illegal operation and had to be shut down. I am running scripts 3.2.1

You have the d3d8.dll from scripts in your Renegade directory but not the scripts.

I get the message "You need to update your copy of DirectX" or something similar, but I'm running DX10.

Ok I updated from 2.9.2 to 3.3 and I was playing in MP's Ultra AOW (2v2) map was hourglass, I was in a med shooting at an arty on the right hand side;

Im just shooting at this arty and my game freezes and im thinking ok hurry up and crash so I can rejoin but when it finally crashed (about 30secs) it went to desktop saying Renegade has encoutered an error blah blah blah so I press ok and try to rejoin, but now when I try to rejoin WWConfig pops up and I press ok it loads game2.exe and then it crashes.

Here is the crashdump and except.txt (Don't know if that one is needed but i'll upload it anyways since it got edited at the same time as crashdump.)

Scripts 3.4.1 exe version with shaders and bloom enabled... I was playing on one of the renz0r coop servers, and I had just pressed K to check on the buildings after an ion cannon went off and I crashed.

Sorry for the double post... 3.4.1 with shaders enabled, but bloom disabled this time. Random crash at Black-Cell for no apparent reason.

And again... I think I died on Field, respawned, and it crashed before I could reach a PT. BC

server and same scripts.dll settings as before.

Also, is this where I should be posting these, or is there a newer thread that I haven't been able to find in the BHS Products/Tech Support sections?

noone ever bothers to read stickies. law of the internet street.
big chance your posts will die in a corner, completely ignored and abused.

edit: and to post a bug, and add some use to this post.

Shaded parts of the vehicle dont believe in lightning from the environment?
