First off, hello everyone..
I use mIRC v6.16, am needing a script for irc.It can either be for my own irc script, or a bot
(Brenbot 1.52 (build 1)) for Renegade MissionDM

I was wondering if anyone could make a script that can take into account how many suicides per
map people have suicided.
I have no clue on how to make a script that can do consecutiveness.

1st suicide of a nick per map =!ppage <nick> <reason>
2nd suicideof a nick per map = !pamsg <nick> <reason>
3rd suicide of a nick per map = !qkick <nick> <reason>
4th suicide of a nick per map = !kick <nick> <reason>

on *:TEXT:*committed suicide.*:#: {
if ($nick == DM-Bot) {
.timer 1 1 msg # !ppage $2 Please don't commit suicide!
}
}
That's all I can figure out.

I'd be glad to help you, but you probably need to update mIRC first.

The version of mIRC doesn't matter, the script should work for whatever versions that use
"remotes" right?

I have 6.3 but choose not to use it, preferring 6.16.
If it will make things easier...I'll use 6.3 version then

Use variables and increment them each time someone suicides.

Version does matter, not much but some aliases/identifiers and stuff are added/fixed in newer
versions. I prefer 6.17

**Note: I wrote this in about 5-8 minutes during my drafting class. It has NOT been tested.

***Note: Someone check my script ^,^

```
on *:TEXT:*:#:{
  if ($chan == #yourchannel) {
    if ($regex($1-,^(Host:).*commited suicide$)) {
      var %n = $regml(1)
      if (%sui. [ $+ [ %n ] ] == 2) { msg # !pamsg %n Please don't commit suicide! | inc %sui. [ $+ [
%n ] ] 1 }
      elseif (%sui. [ $+ [ %n ] ] == 3) { msg # !qkick %n I said...Please don't commit suicide! | inc
%sui. [ $+ [ %n ] ] 1 }
      elseif (%sui. [ $+ [ %n ] ] == 4) { msg # !kick %n I said...Please don't commit suicide! | unset
%sui. [ $+ [ %n ] ] }
      else { inc %sui. [ $+ [ %n ] ] 1 | msg # !ppage %n Please don't commit suicide! }
    }
  }
}
```

Will try this out as soon as I can. Thank you guys!
Zack I'd kiss you if you didn't have a manly name xD
