every time i go to multi-play internet. i go to Westwood online and go to advanced listings, but there aren't ever any servers available. i'm new at this so i need help. how do i get a server "available" so i can play with others? i need one that is free. i know there is a dedicated server, but i don't know the password. well, any help on this receives my greatest thanks! sorry if these are stupid questions to ask, but to tell the truth i don't know hardly anything about online play. if you are allowed to give the password to the dedicated server, that's cool too.

What is the message you get when connecting to XWIS?

Are you connecting to XWIS?

Is your serial valid?

Is your username at least 3 characters long, starts with a letter, and is no more than 9 characters long?

Is your password exactly 8 characters long and correct?

Answer these and we might be able to find the problem and tell you the solution.

=^_^=

when i login it says connection to XCC Online failed, invalid password which is 9 characters (i guess characters is letters) when i login it stops me so i can't input my whole password (which i just thought of may be the problem), the strike-team it says is <http://strike-team.net/>, the server is Renegade, and the nick is crazykid (8 characters). I haven't a clue what u mean by serial. what is the SID stand for? and what does XWIS stand for? sorry if i sound like an idiot...

A password cannot be 9 characters it must be exactly 8 and characters can mean numbers or letters or both.

Do you mean you don't see any servers?

There's a sticky in this forum explaining how to make a new nickname. I'd give that a try.
