I had this same problem long time ago if anyone remmebers? but i never once figured it out...

im crashing on sp maps not my server my renegade i think when anyone joins they crash...

i edited the sp tutorial map.. deleted everything added mp building controller to the bar and thats kinda about it.....anyone can figure it out?

the edited lvl file i placed both lsd ldd files into the map
also the lvl edit file was mtu.lvl and renamed the 2 files into the
m00_tutorial.ldd
m00_tutorial.lsd

placed both inside the map named m00_tutorial.mix

You only need the ldd if I remember correctly when I asked it the isd crashes it or something.

i tried that.....and yet nothing happen...

i tryed:

both files into mix
lsd in mix other file in data
ldd in mix other file in data
new ldd file and left the lsd file that came with map
new lsd file and left the ldd file that came with map

and i think thats all iv done

yrr idk where crash dumps are and whats the file name

and mad...all iv done....well add a few spawners and few zones with script son them but im sure im doing the zones righth the same wya inside the sp maps and added a 2 mp building controllers onto bar and wf....other then that iv tested it jsut empty and yet still crashes.....i can take ss of my lvl map edits?

plz help me with this i pmed over 6 people in servers who have sp maps and yet somehow no one knows how to do it..

also another question how u add building controllers? u just place it touching the building and thats it? or what?

Try exporting it as a PKG and playing the level normally. If it doesn't work then you are one of the many victims of LE dodgyness.
Nothing can be done but a complete remake if this is true.

I think putting MP building controllers on single player buildings may screw things up but I am probably wrong.
If you are doing this server side, don't put the mix file into the data folder. I think you only have to put the .lsd file inside and that's it. Make sure you have the original mix though.

No No No! You can add Building Controllers Serverside on SP Maps! But where did you Placed them? did you tried to enable SP Buildings or MP Buildings? Tell me wich buildings you want to get work! And what map you Edited, MAYBE you had "Terrain Selectable" and you moved the map thats another reason why this map Crashes.

wat i mean is i deleted the sp bar one and replaced it with a mp one cuase a map cant start without a building right? iv seen it another servers expect they replaced the wf or air witha ref controller to get more money.....so i tried to see if this work...so keep so controllers?

Dont remove SP controllers, they placed SP AND MP controllers, the SP controller just makes the Building targetable, and they used a "CUSTOM" when SP ref dies then the MP Controller too

wait so the only thing im trying to do is make the building able to die....ofcourse i can jsut NOT delete the sp but i thought sp on a mp thing would crash it..i guess i can try to remnake map without deleteing the sp contollers soon as i get my mod stuff reinstalled

well pretty much alot of sp maps u know...making a few fun coop maps....i add add pt but if u dont

have a bar or hon cant u not buy any advnace chars?

OK i made the HON on M01 Work. When SP Controller dies then the MP

Controller too, open the .LVL file and look what i attached to the

Controllers and the Daves arrow thats all you need to know to let

Buildings work. The Scripts.dll is the DLL from Scripts 3.4.3, you

need it to use the Scripts.

Controller too, open the .LVL file and look what i attached to the

Controllers and the Daves arrow thats all you need to know to let

Buildings work. The Scripts.dll is the DLL from Scripts 3.4.3, you

need it to use the Scripts.

ok so u have both controllers and when open dies they both dies and thats how you get a building
to work in a sp map?

when hon dies im guessing the game gets won?

i really dont want any builings to work i just need something to die to end the map like when u
pick up an item or destroy like a boss bot with that script thats what i plan on doing,....

one map have a boos bot at the end so when you kill it the game ends...which i saw on gamerz0ne when u killed the rav boss said nod ref destroyed and says gdi won by building destruction which is where i got the idea....but needed to figure how to get the sp maps load without crashing...

but as i said before

1)would gdi still able to buy advance chars? without a bar? how do i have to add a bar controller and jsut hide it somewhere? cuase i wont be using nod in most lvls ONLY gdi chars which killing the hon will work

cuase as i stated all i want...is for the map to load...and to win the game...have to destroy the building or a boss...or even pick up a powerup to end the map and i know u need to destroy the building to end it
