Is there any way to remove the bullet count when ur shooting ur gun so it just dosnt show up anymore? I dont want to have to have my whole hud turned off for that because then i cant even see my aimer or my health or anything. any ideas?

hud.ini in the scripts 3.x can do this. How much work are you willing to put into it?

Probably because when he's sniping he doesn't like having the bullet in his way.

Yeah, that's pretty annoying while sniping. I don't have to be reminded about how many bullets I got left in my clip in the middle of the screen anyway, since they're 4-bullet clips and not hard to count how many shots you got left before you have to reload.
