Hi guys
Can someone help me I want to create lighting but with beams as well
e.g. orca transport on cnc Reborn

:thumbsup:

One way of accomplishing this is to get the Gun Boat's spot light, and add a dazzle at the front of it, that way you have a beam of light, as well as the adaptive light with the lighting effects on it (visual, it does not light up objects, or terrain)

Thx
do you know if you can get things to light up when light hits them

I don't believe there's any dynamic lighting in the game, so it's unlikely that you could do it.

CreedyThx
do you know if you can get things to light up when light hits them

If you know how to script, there might be a way to make one for this purpose.
