Is there any way to edit a save game to make it easier? I'm on the one where you rescue mobius and take him to the surface, and it is SO HARD, even on easy.

You can try the Golden God Mod. I've used it before when I wanted to do some research for an old project for Multiplayer (Server Side Co-Op)

Sure, that would be nice. My save is stuck at one point where like 3 rocket guys spawn and they kill me before im able to shoot them...

And no, I don't cheat online.

Inf health and ammo?

Also, is it possible to make the NPC character you escort inf health? If not, being able to have
repair gun to heal mobius would be awesome.
And all weapons

so far 1 shot kill with pistol and sniper rifle auto relload when you let go of the fire button

you have infinity ion cannon beacons

the health bit isnt working so that aint done

whats the NPC char and whats the char the escorts the infanarry now then i can try fixing that

and ill make the NOD engi repair not kill?

EDIT: i have to say these mods wont work unless you start from beginning i dont think

EDIT: the nod engi will now repair not kill

EDIT: This is it so far just place in ren data folder then start a new game

EDIT: ok the sniper rifle dosent have no reload but you wont need it with the pistol

PS: Do not attempt to play online with this mod in result of BAN from every server you go on

I tried that the other day, sneak around the corner but not too far and kill them that way.
