what the fuck is this and how can it play good movies with audio for such a low file size i found it on limewire years ago
here it is

heres 1 out of the 4 i got

File Attachments

1) [64kmovie 1.exe](#), downloaded 140 times

Fuck me, how long have you been using the Interwebs?

It's called demo scene, making a program that is 64k or less, that plays an awesome video with music that's got bump-mapped textures and shit.

They tend to go really heavy on your processor though.

google "Demo scene" and look for sites that have a few, Some really good stuff, heck someone made a full 3d video game using Demo scene.
