Hi all

Im having a problem with renegade, when i try to login my account for multiplayer it asks for my name and password which i know but the problem is the login button at the bottom of the window is greyed out and cant be clicked.

The New Account button is there and can be clicked but it keeps getting a page error when i click it.

Can anyone help me plz?

Then your nick is too long, your password is too short (8 characters EXACTLY) or your nick contains characters that aren't allowed (Don't use weird punctuation)

Hiya

I checked my nick and even if i type one thats 8 chars exactly yhr login button is still faded, only the new account button shows.

The login button always stays faded out regardless if i type something or not, im using a vista PC it renegade and renguard compatible with vista?

It's the password that needs to be exactly 8 letters long for the login button to appear.

Exemple:

Nick: Heavguard

Password: 12345678
