Renegade Zone has been around for years but I haven't seen a single link to it anyone in the forums. Is there any odd reason or does nobody actually know about it?

I have used it and I have no idea if it is officially dead or not I would say yes.

As far as I know it's updated once every few months. It has a refinery and a harvester but a small tiberium field.

Yeah I know about it, didn't register the name first until I saw the site, so voted wrongly, lol

So who does it belong too then?

I used to use that site all the time... many, many, many years ago.

It's been quite dead since me and the other 2 people who used stopped using the forums. I do see some updates from time to time though when I do check on it.

I used it a long time ago. :/

EDIT: It's the same thing with jserver.net. I rarely heard of it. :/

I also used to use it a lot. I remember it never really updating that much, but man, it has everything there.

I used to use it when i started modding, got all my mod tools from there, and most of the maps from there too.

I only use it to download RenegadeX, i was using it before, but then i found out that there is a better site "game-maps.net" so i started to use that one. It is much better.
