yea ummm wth?

its a .pkg file and i tried making it with and without scripts and scripts2 .dll in it but that dont help
so why does it give me this error? this is not the first map i have ever made but iv NEVER gotten
this error before! any suggestions?

Install the latest version of scripts.dll on the server. This includes bhs.dll, shaders.dll and d3d8.dll

no lol this isnt my pc i personaly turned norton off on mine and use my flash drives version of
avast the best i can LMAO its probably a lot better.

anyway no the p[roblem why it wouldent load and it wouldent read my personal scripts is because,
(dont tell anyone), i put scripts 2.9 in th emap itself by accident :/

When I had Norton AV installed on my desktop pc it kept causing an error whenever I tryed to
open more than one explorer window(or it was something that was not fully contained in the
vault).
