Re-install Scripts 3.4.4

I'm willing to bet you installed scripts 3.X, then CP2.

Fair point, but he posted this in the Renguard client subforum, which probably means RG auto-DLed CP2.

I just fixed the same problem right now by reinstalling it. Only reinstall if nothing works though. It sucks that all the mods/maps/skins/etc. are lost, but you'll live.

Copy the data folder to somewhere else then replace it after you have reinstalled
