Well, I've gotten the server up and running, got the brenbot running fine too.

Only thing is now that when I type like. "!help" it pops up in IRC.
When I write in IRC that is, but all the server commands come up in the IRC too.

I don't want them in the IRC, I need them to come ingame..

And I can't find a single good tutorial for the brenbot.

EDIT: tried updating my 1.33 to 1.52, now the download won't work properly and the server only says "command.xml is missing".

did u try this one
http://new.brenbot.com/files/brenbot/br_1-52_install.exe

---

it has everything...updated...cp2 and ssgm few addons and etc etc

---

Yes sir I did.
I tried that one and the mini-installer, both prooved to be corrupt/not working.
Same was for my friend that tested.

I'm thinking of maybe trying to downgrade to 1.33 again. :/

If your using a shortcut to launch BRenBot ensure that the 'Start In' property is the same as the folder BRenBot is in, otherwise the working directory is wrong. Same goes for running it through command prompt, you have to use cd to jump to the correct folder before running the exe.

I fixed it, I searched around here and on google and found another site that I could download the Brenbot 1.50 from.

Thanks for all the help tho.
