Like you see im Targeting the PowerPlant, when i shot my rockets  
hit the Powerplant but they do no damage and give me no points...  
That happens to many places...

I've brought this up before. IIRC from what I've heard at Black-Cell in the past, it's due to a combination of bad netcode and/or altitude difference. Since it doesn't happen in all places and

flying vehicles can obviously hit things without having to be level with the building, I'd say it's a bug. Not sure if it can be fixed (easily) though.

If this would be fixed, MLRS on Mesabridge would be the best thing in the world!

It has been mentioned before on the TT forums I think. Anyway, I have fixed this already a while back. It was because it used the relative targeting coordinates but clamped the relative coordinates by the level extents. So on maps that did not have much below the normal ground level, you were unable to shoot down.

What cheapass fix did you use then? Change the level boundaries?

There is/was a trick to avoid this 'bug' on hourglass with an artillery (So you could hit the WF,

---

REF, PP, while not getting shot by the AGT). Sadly, this trick doesn't work for the GDI MRLS. It would be so awesome if MRLS finally could hit the Nod PP from the hill (Of course, Obelisk hitting him, as the Obelisk can actually 'shoot over/on' the hill, where as the AGT could only hit his own side, and a small part on the hill).

GDI MLRS on Bridge of Mesa would give GDI the edge in 3v3+ if it would make proper damage, im sure.

When you host a game it all works fine. There is a way around this on Nod but not on GDI.

So on maps that did not have much below the normal ground level, you were unable to shoot down.

Yeah, I brought it up because I wanted to see how it would affect gameplay on Mesa... is this going to be part of the patch?

ha ha get a mrl in the little cave bit next to bridge and 6-lock the arty's whilst splashing the techs. That would be a ownage manouevre due to how easy you can fall back.

Kinda going off topic here but with all the recent threads about DONT FIX THIS AND DONT FIX THAT because of gameplay issues.. We finally get something that will no doubt change gameplay a great deal and noone moans.....

Go figure.

Its one of those things that just pisses everyone off... took me ages to figure out all the right spots to shoot buildings from bridge in order to do damage.

---
