Nothing big, but who doesn't like soccer?
Unfortunately the mix version didn't work, so you'll have to handle the larger file-size. The file is a self-extractor executable. If anyone detects a virus within it, please alert me.

File Attachments
1) C&C_Soccer.exe, downloaded 200 times

You can treat the file like a zip file if you have winrar or 7zip installed. Just right-click it and select extract.

Just tried it, its kinda nice except for the fact that the ball doesn't roll due to renegade physics .
