well... i might know a few things, 1. dont attract attention to yourself, (dont fire at the target if u know u wont get it)2. Stay hidin, being a nod black hand sniper is ok if your good at head shots cause your invisible if u dont fire. 3. go for head shots, (personally, thats were i always go) INSTINT KILL, 4. try not to move around no much unless they figured out were u are, if they dont c u, swich spot constantly, unless u know u can get a shot off before they can, thats all i can think of now, -Happy sniping

On the mission that you have to find & rescue the members of Dead 6 and you all meet at the church, where do you go after the church?? I defended against all attacks but there still shows the objective with the picture of a Black Hand. I followed the arrow and it will show "0 m" and thats it. I tried going back and moving further into the level, but theres nothing. Please help me!!

Sorry to disappoint you, but you've got to shoit it down (providing it's a NOD Apache chopper). A word of advice, though: rockets are way too slow for the chopper. Even though one is enough, you'll waste a dozen more by missing it. Use either the chain gun or expose yourself and wait til it hovers in front of you, shooting at you. The use the rockets.

Funny Story:There was only 8 min left in the game on Under. I was on the GDI team and we were winning so I decided to goof off.I bought havoc, ran through the tunnels, did the usual running

from rock to rock and made it into their hand of nod. Now great hilarity ensued as I sniped the enemy team from behind. There was a lot of *****ing and "wtfs".. They finally found me after I ran out of ammo and was pistol sniping.

did the same thing... You want to check to see if any of your guys in the building are shooting at anything. They probably won't hit them so you'll need to. I passed up deadeye like four times shooting at something, then I decided to look at where his gun was pointed. Surely enough, there was a nod soldier standing on the stairs. Try looking around once more!

I'm an ace sniper on the campaigns but when it comes to WOL or Gamespy the sniper's worst enemy is LAG. If u know u don't have a good connection then never go a sniper You'll just be shooting at a guy then the lag moves him away from that place its very frustrating

[View Forum Message](#) <> [Reply to Message](#)

But don't lead my much!The bullet pretty much goes instantly with the sniper rifles!Don't zoom in too much, cause if they move you might lose them!And have a steady hand, and make sure your mouse isn't dirty so to not let you aim precisly!Peace

I had that problem. Somebody told me that you have to kill those choppers right from the start or

they fly away and you lose. Ion cannon works good on choppers.
