if you mean "install", just put the .pkg file in your renegade data dirrecotie:

The First Decade:

C:/Program Files/EA Games/The First Decade/Renegade (tm)/Renegade/Data

Normal:

C:/WestWood/Renegade/Data

(i think)

then just run the game and when *HOSTING* a game, go to the map selection, and click on the mod pakadge area, then select yours.

The answer is basically this; "You don't." i say u can but not sure about IvI files.

Create a new mod u open the mod with ren ex extract everything in the mod folder replace objects.ddb with the standart objects.ddb (*mod name*>Presets) then replace other files with the standart ones (ini's and others) then using level redit get the IVI file and ur done (i imported some mods but not IVIs)
