if you talk about opening original characters you probably tried to open c\_ag thingies? those are all 1 kb. open up other files like c\_gdi\_dead\_l0.w3d all character files with l0 at the end are the right ones.

and if it looks all messed up also open s\_a\_human.w3d then they view right.

look screenshot to see what i am talking about with the l0 files

I also would suggest that you might be careful when playing online with modified characters as this raises flags in most moderated servers, just a tip!
