Could some one make the GDI apc look like this:

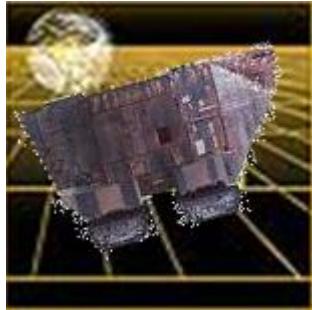

Thanks. Also, could you make the purchase block look like this:

EDIT: but better - without the white stuff.

=Samous

Don't know how much work goes into making a skin, but that would be nice...
...except for one thing... the shape of the APC totally doesn't fit the shape of the sandcrawler.

Then making a new w3d model with new texture would do it

Imao, i just copied and paste a image on top of one of the avitars from this forums. I don't have anything i could use to make a texture for renegade, i know hiw, but i don't have the equipment. I only can make tga, not dds. Now would someone try to make this? PLZ!!

EDIT: yes it would envolve editing W3D files, but all you would really do is kida flip the apc, and change the tires. then either make a skin, or ask some one to make one, and it will be made.
PLZZZ!

SOME ONE PLZ MAKE THIS FOR ME!

I'm not sure you fully understand the process of modeling and putting a model ingame.

Also, Sandcrawlers are meant to be ungodly huge. Seeing one as the GDI Apc would be downright retarded.

lol. the apc has the same (similar) slant just upside down as the sand crawler. i know its suposed to be HUGE in star wars, but i still would like it. i'm going to ceap on butting out requests tell some one finally mAKE SOMETHNG FOR ME.

EDIT: oops, caps was on. i don't care if no one whants it, but i would just like it if some one would atleast make on f my requests. Seriously, poeple do this W3D editing with the textures alot, EX: chem warrior to Clone trooper forum. so y won't any one do thiss, it shouldn't bee too too hard. (yes it would be hard, but you can't spend your hole life doing easy stuff, or you'll never learn the hard stuff)

Why don't you learn how to model, bone and texture and do it yourself?

I tried to make a turret last night to see if I could do it. Turned out to be as big as the entire island because I messed up one step.

Also I can't texture because I don't have Photoshop.

Main reasons why do-it-yourself jobs don't work out for me.

and yeah I know that question wasn't aimed at me, but still

Crap. I spent 30 mins on a vehicle in gmax and it won't export it.

Oh well I'll retry later.
