I am looking for a free virus software that does the job, and kills all the current viruses on my computer. Just a free - software. Please. If anybody knows any software that I can download please tell me.

Thanks.

I have AVG. Haven't had a virus, and only one early warning removal in the past three years.

Also, may want to get Lava Soft's AdAware. I actually find it more helpful than an antivirus; in tandem with AVG, my PC's been stable for quite a while.

SpyBot - Search and Destroy is pretty good, too.

http://www.safer-networking.org/index2.html

SpyBot - Search and Destroy
Ad-aware 2008 -free
AVG -free
Malware destroyer -free
Spy Blaster -free
Hijack this -free
CWShredder -free
Symantec - not free
mru blaster -free
Spyware Terminator - free

Just a few i use

For the best but non-free Anti-Virus I suggest Nod32(around $60), for free Anti-Viruses: Avast and AVG Free.

Norton antivirus is TERRIBLE. Absolutely TERRIBLE. It rapes your RAM, CPU, and hardly ever detects any viruses. And the fact that you need to rebuy it every year and shit.

Not norton one

Symantec antivirus corporate edition

It does not have all this extar shit its very simple effective as norton and not this high cpu gui and such matter of fact my laptop has 512 mb of ram with vista and with that and still runs smooth, trust me i had norton anti virus and trust me i know what your talking about its mixed everywhere high cpu high memory usage and o ya Symantec anti virus corporate edition does not require a cd key and also does not need to register or activate or renew you just install and boom your ready it works great, AVG slowed my pc down more then this

Ah, they're different? Nevermind that, then. Alot of people often call norton "Symantec".
