It uses a normally unused bone that has a different damage factor. Request file to be removed.

holly shit.. so... its possible to increase damage inside the w3d model OoOOoooOO
like i say, its from "ren 2000 beta asset"

file removed as requested

to avoid this kind of situations in the future, i just wont release anything here anymore

He makes stuff to get people like you banned and you call that being nice? When servers ban you blame the "nice person"

When gonz got banned... I wonder why he got banned and he told me that he downloaded Scrin's C4 so I asked where he got it from. I downloaded it and I tested it out with "raven" and it shows up as DH on my name... Good job Scrin go fucking die

What part of doing 4 times as much damage as with normal C4 do you not get?
Basically, because it does 4 times more damage then it should,it is a form of cheating.

Scrin, did you make this C4, or did you get it from some folder/achieve?

Should have open it in renx and delete everything except for the mesh, then re-apply the textures and export.. Then there would not be some other bone inside it
