I was playing around a bit with 3dsmax 8 and i made a render out of some models. Since they are C&C 3 models i though i could share the render here (first time i use those 3ds options)  
Nothing special but i just posted it

3DSMax MentalRay Render

Res: 1600\*1200

Watermark: Gimp

Toggle Spoiler

Thanks for the compliments

@MGamer: it could. textures are ~750kb each  
\*EDIT: lol that is even bigger than my render

Thanks all  
Eventually i though it wasn't that good or anything.

First i wanted to make 3 zone trooper in different positions (1 running with gun in front, 1 holding gun up, 1 in fire stance) but these models didn't support the other textures so i decided to make this

Maybe i post my other idea aswell but without different textures on them.

U mean the characters/models on the render?  
2 Zone Troopers and 1 Orca. Those models are from C&C 3

Nice renders!  
I made some of these myself early this year:

Orca looks good

Only is it my PC or does that Scrin airplane thing (forgot the name :/ ) look a bit blurry?

---

Well i made a render of my first idea but as i said those models didn't support the other textures. Also they were limited in the special effects, so this is a really basic render.

3DSMax ScanLine Render (couldn't use MentalRay on these models)  
Res. 640\*480

very nice renders

u actualy gonna use them in ur mod?  
i hope no...

Neh not gonna use them in my mod. These are models from Tiberium Wars so to low quality for a FPS and it would be stealing

Just trying to do more with 3DSMax besides trying some C++ programming

---
