Hi, Everytime I join a server my game crashes right away, I last long enough to see the message of the day and even hear a bit of audio but then my computer just freezes and I have to reboot..I've tried reinstalling about 3 times now and still the same problem.
Thanks.

This sounds like a hardware problem to me. Do you also play other games? Do they give you the same problem?

Nvm, It turned out windows firewall was blocking it or something and decided not to tell me, and it also decided to crash my computer.
