did you see the text "THIS TAB IS NOT FOR BEGINNERS"

anyway, you will need to fill in the details as explained.

example:

FTP upload informations

Host - ftp.wittebolx.com

User - wittebolx

Pass - somethingawesome

and about the reporting path's.

example:

root/httpdocs/myrenegadeinfo/

ps. if you dont know what FTP is then please learn the basics before trying this!
