By the way I forgot how to add those muzzles (when you shoot you see some fire or something).  
Also i need to know how to add emitter like smoke, but it must only appear when a bullet is shot

Anyone knows the w3d settings for those?

(thanks to scrin for making my special renegade logo )

Yo put the files within this .RAR pack in your data to see the muzzleflash (fire effect) from when you shoot.

Its nice

MUST HAVE OTHER PACK WHICH I SENDE BEFORE IN YOUR DATA TO.

Remington 870, preferably in the black and silver style.

I'd 'bone' that 'model'.
