The update for Renegade is no longer valid due to EA taking down the location with the update to 1.037.

Meaning: Anyone have the update file?

EDIT: Found solution.

<ftp://ftp.westwood.com/pub/renegade/updates/>

Update the stickied (re)install post?

What? I'm downloading it this very moment without a problem.

Anyway, you can find it here.

I don't understand. Where were you getting your patches previously? The Westwood public FTP has always been in the reinstall guide.
