Thank you.

On behalf of the Renegade X development team, I'd like to thank all of our fans. We've made it to Mod DB's "Top 100 mods" for their annual Mod of the Year (MOTY) awards. We could not have done it without you, and we are greatly thankful that you have chosen to vote for Renegade X out of over 8,000 mods.

We call on you again!

The phase 2 to the MOTY has now begun. This is the real challenge. We are up against all the other unreleased mods for the Top 5 Unreleased category. Voting is now reset, and the top 100 mods are in competition for the top mods and indie games position. THIS MEANS YOU CAN NOW VOTE AGAIN IF YOU ALREADY HAVE VOTED FOR RENEGADE X DURING PHASE 1!

All it takes for you is three clicks of your mouse. Visit this page:

<http://www.moddb.com/events/2008-mod-of-the-year-awards/top100>

And under the "Top 100 Best Unreleased Mods & Indies of 2008" category, click Unreal Tournament 3, and then click on the "VOTE" button beside Renegade X.

If you feel that Renegade X has delivered good updates, trailers, podcasts, and information in the past year, then we need your vote. We at the team have worked very hard on the mod, so if you enjoy seeing our work, and if you want to see Renegade X make it big, then your vote would be appreciated. Voting is the best way for average fans like you to help the mod receive more attention - after all, C&C mode deserves all the attention it could get! Remember that you can vote for as many mods as you want, so if you've already voted for another mod, you can still vote for Renegade X.

Spread the word!

Did you vote for Reborn, AR, BFD, and APB?

I think Renegade X is the only mod I voted for this year. It's not that it's the only mod I like, just that I'm so lazy I never got around to voting for the rest.

I blame Renegade X's aggressive PR campaign.

You guys really do a great job at getting the word out, I hear more about this MOD than I do about full games being developed by major companies.

I voted, but only to support the team. I still think it's nonsense to vote for a mod that has had no release at all .

I think they've already proven themselves with the awesome trailers and the other media they released.

I actually agree with Gostow here, Renegade X looks awesome and I don't want to put them down but I'm a little worried Renegade X wont have the same "glitches" of reality that renegade has. And be more like CS:S or TF2. For example the "sniper dance" may not be possible because moving in CSS takes a little while to get up to speed.

If I want that sort of behaviour, I will play CSS.

Why is the tick on the "click this one, not these ones" screenshot backwards?

There's a reason why there is a released category and an unreleased category
