Ok check this thing out, it's pretty neat.

<http://www.yourfonts.com/>

You go and fill out a template, then scan it in and upload it and they make you a font. I've attached a document I had sitting around that I changed the font on to my handwriting font. It was a circuit simulation project I had to do.

Anyhow try this out, writing in your own handwriting on the computer is freaky.

Haha,

Would be good for me when i get punished and have to write down the same sentence over and over.

"Ik mag niet door de les praten bij wiskunde, dat is zeer onbeleefd."
