any updates on this patch..?

maybe a approx. release date?

it was announced in june 2008... and we havent really had a word on how it was progressing that actually showed if it was near complete or not even close

also this city2 shipping with it... will it be flying and ground or just ground?

there are another 5000 threads like this.

the patch comes when its done... TT will not announce anything else than this.

i think city2 was flying...

He knows rocky he has made all the topics.

And city2 is ground and flying hitman is just asking if the patch will include both the ground and flying version, which i assume they will(doesn't make sense not to). The flying version is more balanced so they will probably put it in.

They announced so ppl could report bugs etc, they just over estimated the patience and intelligence of the ren community

the bugs that are actually worth fixing are known by every person that ever played ren online

@Hitman:

You can already download my City X Series maps at my renegade modding page (link in my signature)

It contains:

City2

City2_flying

City2_extended (rotatable MRSL, Recon Bike, Silos, Helipads...)

City3

I don't know what TT plans exactly but I think they pack at least City2 and City2_flying to their patch.

So as you can see you have a flying and non flying version of City2.
(City3 is infantry only)

A suggestion for the moderation team: A one week ban for anyone posting topics like this, since it's clearly stated in about 50 different places that you SHOULD NOT post topics asking when it is going to be done.

And yes, I am well aware this suggestion will not be taken up, sometimes it's enough just to vent frustration by posting it, even though you know nothing will be done about it.... *sigh*

Imao, who knew a post could cause this much stress? Hitman i suggest u stop posting, you didnt think about people's feelings before you posted. renegade posts hurt.

What he doesn't understand is that posts like this take additional time for the TT team to sort through which means less time actually working on the patch.

Yes, the 2 seconds must make a big impact.
