Lol, not bad, its not my kinda thing but its not bad for a first Orca skin, even though you have removed the rotary fans.

I like the theme of it, but removing the rotors kinda killed it. What i suggest is have some1 help you with the blades or try it yourself, and have it colored with the same colors (GDI yellow and grey) alternating between every 2 blades or so. I'm no skinner, just my opinion

Nice job

Honestly it's not that great. Looks like you just put a large texture over the default Orca, with no regard to the parts you were covering etc. The lines don't connect, the rotors and the missile pods are covered, making it look pretty bad, like it's wrapped in solid grey tarp or someshit. Keep learning becuase just the fact that you know how to edit textures shows you have promise, but pay attention to what you touch and how it affects the overall look of the subject.
