

Ok, here just a tiny preview out from my projects.

Since Di3HardNL doesn't want to helping me anymore with everything, i have starting my own projects with my own style, and here result, (here some pics from my legit models)

p.s. 1 all models have own highter texture names with my new alpha layers and all 3 views (first, third and back persons in HD model from F_gm), and animated stuff on it (some videos/screenshots is old and from first weapon's build (its because i'm too lazy, low life and retarded to create new videos for all my models and updates k?))

p.s. 2 the beta timed c4, ramjet, custom obelisk remake, beta chem sprayer and laser rifle has new normal(mip) maps-sun shine effects (or this shit called bump mapping... dont remember the name, but its from canadacdn's tutorial or some...)

p.s. 3 btw lol i have created new ramjet rifle beam (the muzzle trail) without fucking Level Editor and Objects.tdb (on my ramjet videos...) so all this perfectly works online and give no lags at all!

p.s. 4 i have problems with railgun GAUSS remake from Crysis:Warhead, if someone have the working CGF converter-->contact me

p.s. 5 also i have remaked few weapons from current C&C Reborn mod and just get new huds, but i cant show screenshots, because reborn (the Spencer) will trick me again!

And i'm sure what some idiot mod dude will banned me from here again and locked this because i have posted new topic on this subforum... so Fu:Ck A1L!?

And before that

Ute5128932494325943 and Cabal2605042347 or other homos like mandabras orerrrrwtfnowaihaxbzzz.... come here to ruin the topic, i will repeat... fuck me again pl0Z kO?!! (N0Ba!!)

and i have some free stuff for you all (if all be okey, i will share more, deal?) ---->

ramjet final (video old)

p.s. the advanced guard tower's small guns is flying on the ground, because map is bugged (not the model!!) is that clear?

<http://www.youtube.com/watch?v=SxgntZBewKw>

stealth black hand laser rifle final (video old)

<http://www.youtube.com/watch?v=mR6T6tAMV8g>

plazma cannon-sbh laser replacement final (video is way oooooold)

<http://www.youtube.com/watch?v=-nplzbjxKk8>

my and Di3hard's old project (i made it perfect) E3 Beta GDI Refinery finnal+video

<http://www.youtube.com/watch?v=ZDxqt5esHjA>

my own hand of nod beta style vinal+video
<http://www.youtube.com/watch?v=8o6HF0QhYLs>

this is my new C4 pack (was extremely hard) final
APB mammoth for proxy, orca for timed and terminal for remotes (all perfect)

Hmm I dont like the agt to be honest. The textures are nice but the placement of the extra stuff screw it up. Internal tv status screens on the outside? (The agt guns dont fit which I know is a pain to rig)

Well the ramjet rifle is nice but the thing is the model is now unbalanced. The blue screen is nice but doesnt create a better gun. Same for the laser rifle in real combat that small screen would break of in a snap.

The tibvolt thingy looks cool but unbalanced as a gun. (The voltrifle on top is badly rigged onto the tibtrifle / where the muzzle of the volt is)

That ref is no where near the beta ref. The roll door is from beta contructionyard. Next the smoke pipe is different. Anyways here is a shot of the real one. (You can find the beta ref gmax files in the buildings.zip supplied by westwood, look in singleplayer under gdi ref WIP)

The model in the buildings.zip is not finished I will make a pack for a seperate fixed ref with original doors and some fixed assets. ->

Anyways why do you keep wanting feel better over other people by posting this when some of your models are unbalanced? As for graphics on all objects it is very nice but shape/organize wise it is bad.

the difference between my tiberium ref and your is: I can go to any server/map/game with them and play perfectly. You can do same thing with your DoOrBeTaCoNsTrUcTiOnYaRdReF? don't think so

And about weapons, im sure you are happy with your gun on that screenshot, mister Turbo squid cheap ramjet model replacement from Di3 and me

And im sure you are happy with this mutafucker dude on your server team? (i'l was simple trying to explore the M02 map, and got this...----->

At least I didnt use that ramjet in any of my projects without crediting the original author.

(the original author is ivanxxx check out the nitro readme "searchterms turbosquid for sci-fi sniper rifle, or just sniper rifle") [And the meaning of turbosquid is to buy or free to use stuff] And the beauty is everyone can use this ramjet.

The meaning for that ref is that anyone can use it. Model something different out of it and not for your use only. You just seem to love that with anything. You know what? Even after this I keep my promise to not release the hud you made for me even that I want to do it.

I dont think it is a wonder that people stop helping you.

You need to shut up. Really. In the short amount of time you've been here all you've seen is he and Di3 posting videos everywhere of cool skins/model replacements and you interpret this as some sort of gift from god. Newsflash: in this thread he released nothing shown in the screenshots.

You're so blinded you easily ignore the text in his posts in which he acts like an idiot and trolls, badly, in an attempt to butthurt everybody even more than before. His work is quality. Even I have to admit it. Some of it is a little too shiny and in some cases he adds worthless clutter to already nice models but he's a talented graphical artist. Unfortunately this is pretty much balanced by the fact that he is a completely stubborn jackass.

Check this:

ScrinAnd i'm sure what some idiot mod dude will banned me from here again and locked this because i have posted new topic on this subforum... so Fu:Ck A1L!? and i have some free stuff for you all (if all be okey, i will share more, deal?) Razz ---->

Translation: if everybody will let me be a faggot and wildly insult people, I'll maybe consider releasing my work! BUT ONLY IF YOU DON'T BAN ME!

Scrin is a child that doesn't deserve an internet connection. Cut with the fucking god worship and learn to read between the lines.

Why are you involving me in this u6795? You sound like the only thing I did was showing videos and screenshots.

I released many things.. and I don't think I am forced to release EVERYthing what I made for Renegade.

There are a couple of things which I like to keep for myself. And I didn't even mention the fact I written tutorials for you guys to make some of your own.

Thanks, I gues..

Sorry if my post sounded like it downplayed your work- your releases are steady and very high quality. The tutorials are also a really cool thing to do, considering it'd be easier with your skill to just keep to yourself. It was simply meant to emphasize how you and Scrin had worked together, resulting in a lot of advertisement for his work that we see around the forums.

I actually don't want any thing (well, maby the ramjet, but still) b\c my computer can't handle mods too well, especially ones that change the w3d. I have 5 skins, and thats all now. 2 of the five are b\c the mammy and flame have glitched skins if I don't use them. I am too lazy to explain why my computer won't let me use mods, but I am attempting to help him b\c I appreciate his work, I think Scrin is good at what he does, but has a quick temper (no offense) and can some times be a little selfish, but usually it is only b\c he had his temper set off by someone else.

Also I was the one putting lights on the field map, adding those tib crystals on the tiberium field and smoke. Scrin added some tiberiums on the wall, which don't look very good i have to admit..
