Release plz?

Dreganius is the dude who makes Ren40k.

Logic dictates he would have it.

I've released the Flamer, but I'm waiting for a few more weapons to be completed before the
Sniper will be released. Also, I need to fix the reload sound for it; although I had to make it myself,
it sounds a little crackly. Guh.

btw, talkin about the flamer, it's a bit big (the hands are too) and it has no firing animation, i mean
it moves up and down like it's idle animation. Could you add one ? at least like the normal one

Well, to begin with, the Flamer is actual size (Those things are actually huge, meant to be wielded by an 8-foot augmented superhuman Space Marine), and the hands are more or less the size of a Space Marine gauntlet. The animation I can't do anything about currently. Also, keep in mind that although I textured the thing, I have others on my team that do other things.
