Does anyone know what the name of the .dds on the barracks is?
It's the part that goes all around it like bumps.

Keep in mind it also changes a big part of the ref (both GDI and Nod), so what may look good on the bar, you may not like on your ref.

It only changes the floor of a ramp on the Ref.
This ramp is the one available on flying maps.

Also the inside of the area where that thingy slides up and down.

Edit2: As I look at this SS it may also be changing that lil line near the light post and Ref door.
