No it isn't already there...

Download it here. Read the Readme that's included and it will tell you how to install it: http://ren.game-maps.net/index.php?act=view&id=1002

You have to first install it into your gamepack directory before you can do that...

You have to set it up.

Right click on an open spot in the top toolbar and go to customize. Scroll down to "Import a W3D file" and click and drag it anywhere on the toolbar. It is an invisible icon, but when you click on it, you can import W3Ds.

If there is, I don't know about it. It isn't that bad though, just remember where you put it and you will be able to find it fine.

I say that because ---> E:\gmax\gamepacks\Westwood\RenX\ui\icons

These are supposed to be the icons.

Well, I tried to edit the button's icon, but it wont work. Every time I apply a new image or make a text label, it just shows up invisible.

Anyway, this is how it looks for me:
