It's a small Threaded Humvee that looks cool I call it the thumvee.

Made by ErroR and Nassepossu, all right reserved. You are allowed to use, share and copy this model to anykind of freeware stuff as long as this file is included inside.  
Error: idea, making.  
Nassepossu: boning the tracks to work properly in renegade.  
This is not a replacement.

Very nice but indeed; the HumVee now needs a texture to fit the Mammy threads (or atleast they look like mammy threads )

you should definitely smooth it out so it looks more flush and one piece.

If I remember correctly I had named one bone wrong.

I wonder when I last time posted a post to renegadeforums.

Re-skin it and it will look like an Amphibious Tank for Anti-Infantry.
